Databases: PostgreSQL, MariaDB, SQL

API/Security: Swagger (OpenAPI), JWT

Caching/Messaging: Redis (Cache, Pub/Sub)

DevOps & Tools: Docker, Docker Compose, Git, GitHub, GitHub Actions (CI/CD), Jira Also: JavaScript, Python

EXPERIENCE

Software Development Intern - Infoset | Istanbul, Türkiye | 30 days

- Developed and improved .NET Core Web APIs using a layered architecture (Controller / Service / Repository).
- Worked with EF Core (migrations, database operations, LINQ queries) and relational design in PostgreSQL/MariaDB.
- Implemented Redis caching and Pub/Sub patterns for service-to-service event communication.
- Documented and tested endpoints with Swagger; implemented JWT authentication and authorization.
- Built containerized environments with Docker & Docker Compose; participated in GitHub Actions CI/CD and automated deploys to staging.
- Followed team workflows: branching, PRs, code reviews, and Jira sprint/task tracking.

SELECTED PROJECTS

Listed briefly for balance; code samples available on GitHub.

- git-brief: Python CLI that generates structured briefs for GitHub repositories.
- chrome_spotlight: Chrome extension for quick search and navigation across tabs/history/bookmarks.
- doctor-on-my-phone: AI-assisted triage-style web app with a safe-use disclaimer.
